

BOIL WATER ORDER

Tests show Coliform Bacteria in Timberland Mobile Home Park's Water

BOIL YOUR WATER BEFORE USING

CUSTOMERS OF THE TIMBERLAND MHP ARE HEREBY ORDERED BY THE CLINTON COUNTY HEALTH DEPARTMENT TO BOIL ALL WATER FOR DRINKING AND CULINARY PURPOSES.

John Kanoza, DIRECTOR OF ENVIRONMENTAL HEALTH

A drinking water standard was violated. So far in April 2010, 2 out of 2 routine monitoring samples showed the presence of total coliform bacteria. The NYS standard is that no more than one of the samples may be positive in any month.

Coliforms are bacteria which are naturally present in the environment and are used as an indicator that other, potentially-harmful, bacteria may be present. Coliforms were found in more samples than allowed and this was a warning of potential problems.

DO NOT DRINK THE WATER WITHOUT BOILING IT FIRST. Bring all water to a rolling boil, let it boil for one minute, and let it cool before using, or use bottled water certified for sale by the New York State Department of Health. Boiled or bottled water should be used for drinking, making ice, brushing teeth, washing dishes, and food preparation **until further notice**. Boiling kills most bacteria and other organisms in the water.

Whenever coliform bacteria are detected in a sample, follow-up testing is required to determine if other bacteria of greater concern, such as *E. coli*, are present. *E. coli* were not found in this subsequent testing.

Harmful microbes in drinking water can cause diarrhea, cramps, nausea, headaches, or other symptoms. They may pose a special health risk for infants, some elderly, and people with severely compromised immune systems. The symptoms above are not just caused by organisms in drinking water. If you experience any of these symptoms and they persist, you may want to seek medical advice.

What is being done?

The water system will ensure that water disinfection equipment is working properly and that a proper chlorine residual is maintained. You will be informed when tests show no coliform bacteria and you no longer need to boil your water. For more information, please contact Jeff Twigg of the Timberland Mobile Home Park at 834-9495 or the Clinton County Health Dept. at 565-4870.

Please share this information with all the other people who drink this water, especially those who may not have received this notice directly (for example, people in apartments, nursing homes, schools, and businesses). You can do this by posting this notice in a public place or distributing copies by hand or mail.
