No New Cases of COVID-19 in Clinton County

Plattsburgh, April 12, 2020. As of Sunday morning, no new confirmed positive cases of COVID-19 were reported to Clinton County Health Department. Saturday’s case total, per the NYSDOH website was 43 and remained at 43 on Sunday. CCHD reports that 28 of the laboratory confirmed cases are now recovered.

Mr. John Kanoza, Director of Public Health for Clinton County, was pleased that at least one reporting period had passed with no new cases. “I look forward to the day when no new cases is the norm, rather than the exception,” he noted. Mr. Kanoza also reminded residents to continue to maintain their personal safety practices. “Stay home as much as possible. Go out only for essential errands. Wash your hands often and practice social distancing.” The Clinton County Health Department recommends wearing a mask or other face covering as an additional barrier during trips out for essential needs, but advises that a mask should never be used in place of distancing.

About the Clinton County Health Department:
