## Clinton County Health Department Press Release Community Partnership Award November 13, 2008

The Clinton County Health Department recently gave three Community Partnership Awards for exceptional work done by community partners in helping with the Department’s public health mission. Dr. Stanley Hatch, OD from Adirondack Eye Care was recognized for participating in the Department’s annual pediatric health fair for almost a decade conducting vision screening on hundreds of children including the youngest and most active youngsters thus helping children and their families through the early identification of developmental and vision needs. His patience and engaging, age-appropriate techniques have benefited both children and parents.

The Department also recognized Bill Todd from the City of Plattsburgh and Dave Comfort from the Town of Plattsburgh Water Districts for their diligent and dedicated work that they have done in providing these water systems with fluoride. Municipalities that maintain fluoride in water systems provide a substantial public health dental benefit to their communities. In addition, both water districts received a Water Quality Award from the CDC (Centers for Disease Control) and Prevention United States Department of Health & Human Services.
