

Have something to smile about with the

NYU Dental Outreach Program.

Comprehensive dental care for all ages will be provided by faculty and students from NYU College of Dentistry.

Services available include:

- Dental examinations.
- Fluoride and sealants for children.
- Fillings.
- Extractions.
- Root canal treatment.

This program is available for people who have difficulty accessing dental care. All ages are welcome, and there is no out-of-pocket cost. Insurance is not needed, but it will be billed if available. If you have regular dental care, please see your provider, as this is not a substitute for your current dentist. No braces, implants, dentures, or whitening.

Patients will be seen on a first-come, first-served, walk-in basis. Please be prepared for long lines and bring snacks and quiet entertainment.
