How Baby Meets His/Her Pet...

If you already have a pet, there are things you can do to make the addition of a new baby more pleasant for your pet and your family.

- Before taking the baby home from the hospital, the baby's blanket should be brought home for your pet to sniff. This lets your pet get used to the baby's scent.
- Once home, under close supervision, allow your pet to sniff the new baby.
- Your pet may feel jealous about the newcomer and may need reassurance.
- Take time to give your pet attention.
- Always closely supervise your pet around your infant or toddler.

About Pets...

- Select a dog carefully.
- Neuter a dog, as early as possible, to reduce aggressive behavior.
- Never leave babies and young children alone with any animal.
- Help your puppy to be calm and well behaved by teaching such behaviors as rolling over to show their stomach, allowing food to be taken away without growling.
- Don’t play aggressive games with your dog such as wrestling or “sicking”.
- Cat scratches can be serious; watch for infection.
- Keep your pets safe on a leash or in your yard.

PROTECT YOUR PET FROM RABIES

Your dog or cat can be vaccinated for rabies when it turns 3 months of age. One year after the first dose, your pet requires a booster, which is then good for three years. For the rest of your pet's life, it should have a booster shot every three years.

How can you prevent dog bites in children? In Clinton County, hundreds of children are bitten every year... Most of these bites are preventable.
Know How to:

- **RECOGNIZE** the warning signs of aggressive animals.
- **AVOID** or **PREVENT** an animal attack.
- **DEFEND** yourself, or your child, from an aggressive dog.

**Reasons Why Dogs May Attack**

They may be:

- Protecting their puppies, territory, or family members
- Feeling threatened by you
- In pain, injured or ill
- Surprised by your sudden appearance
- Bothered while eating
- Frustrated from being chained or tied
- Excited, nervous or “playing”
- Old and don’t like to be bothered

Animals may attack for no reason at all, or if they have been trained to attack.

**Remember, any size or breed of dog can bite!!!!**

**Know The Warning Signs of an Animal Who Feels Threatened**

- **An aggressive posture:** The ears are erect, the body is stiff or tense, and the tail is stiff or moving fast.
- **A fearful posture:** The ears are back, the body is crouched with the head down, and the tail hangs down or is tucked between the legs.
- **Growling, snarling or snapping**
- **Staring** straight ahead
- **Teeth** showing or curled lips
- **Hair** standing on end

**Teach your child to:**

- Never approach a dog that you do not know or the owner is not with the dog.
- Only play with a dog when a parent or an adult is nearby and only after getting the dog owner’s permission.
- Tell their parent(s) or an adult when they see a stray or unfamiliar dog.
- Stand still when approached by a strange dog.
- Not bother dogs that are sleeping, eating or caring for puppies.

**More Teaching...**

**IF THREATENED OR ATTACKED:**

- Avoid direct eye contact with a dog.
- Never run or scream. Slowly walk away sideways.
- If attacked, curl up in a ball on the ground, stay still and protect your face.
- Tell an adult immediately.
- Try to remember:
  —if the dog had a collar or tag.
  —type, size, and color of dog.
  —where the dog ran.
- Wash any wound with soap and water.

**FOR MOM & DAD**

- See your child’s doctor at once if your child has been attacked.
- Report any animal attack to the Clinton County Health Department at 565-4870.
